**Color Temperature** (CCT) describes the warmth or coolness of a light source. It is expressed and measured on Kelvin (K) numbered scale.

**2700K\*** (Soft White) & **3000K** (Warm White) give an orange/yellow glow, which create a cozy and relaxing atmosphere.

**4000K** (Neutral White) offers a clean and refreshing tone which is preferred in spaces, where clarity is of higher importance.

**6500K** (Cool White), with a slightly blue tint, is brighter and offers more contrast.

\*2700K is currently available only for TOSHIBA LED Filament lamps. You can also find our special Color Temperature Filament Lamps at 1800K, 2200K.
